1329.0.55.002 - Vineyards Estimates, Australia, 2005-06

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 20/12/2006

Summary

Main Features

Estimates from the Vineyards 2006 collection show that the season 2006 was similar to the previous two seasons. Grape growers cultivated 168,800 hectares of vines, a 1% increase from the 2005 season. The total bearing area for grapes rose to 158,200 hectares, while the area not yet bearing fell again to 10,624 hectares. Red grape varieties comprised 58% of the total area of vines and 59% of the total bearing area.

The estimate for total grape production in 2006 was just below the 2005 record at nearly 2.0 million tonnes. The largest producing state, South Australia, recorded an increase in production of 3% to 885,800 tonnes which offset a decrease of 3% in 2005. New South Wales replaced Victoria as the next largest growing state, with a small increase in production to 509,900 tonnes while Victoria's production decreased 10% to 497,200 tonnes.

Red grape production (1.0 million tonnes) was higher than white grape production (954,900 tonnes). Consistent with last year's record outcome, 1.8 million tonnes of grapes were harvested for winemaking. The production of grapes for drying fell by 13% to 117,800 tonnes while the harvest of table and other grapes rose by 12%, to 81,700 tonnes.

South Australia remained the highest red grape-producing state with 54% of total production. South Australia replaced Victoria as the highest producer of white grapes with 34% of total production, followed by Victoria with 31%.

Three varieties of grapes accounted for 55% of all production: shiraz (422,600 tonnes), chardonnay (397,400 tonnes) and cabernet sauvignon (274,400 tonnes).

The principal source of water for irrigating vines in 2006 was surface water from state or private irrigation schemes, with a total of 87,800 hectares of vines irrigated from this source. The principal methods of watering vines in 2006 were by drip or micro spray, with a total of 116,800 hectares of vines irrigated by these methods.

(State data are available on request.)

GRAPES(a), Area of vines at harvest (ha) - Year ended 30 June

	Australia		
	2004	2005	2006
RED GRAPES			
Bearing	92 892	92 849	93 967

Not yet bearing: planted or grafted prior to collection year	3 173	2 809	2 744
Not yet bearing: planted or grafted during collection year	2 224	2 375	1 400
Total area of vines	98 290	98 033	98 111

WHITE GRAPES

Bearing	57 669	60 355	64 199
Not yet bearing: planted or grafted prior to collection year	4 627	4 560	4 024
Not yet bearing: planted or grafted during collection year	3 595	3 718	2 457
Total area of vines	65 891	68 632	70 680

TOTAL GRAPES

Bearing	150 561	153 204	158 167
Not yet bearing: planted or grafted prior to collection year	7 800	7 369	6 768
Not yet bearing: planted or grafted during collection year	5 819	6 093	3 856
Total area of vines	164 181	166 665	168 791

(a) Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

GRAPES(a), Production (fresh weight) (t) - Year ended 30 June

		Australia		
		2004	2005	2006
RED GRAPES				
Winemaking	1 063 075	1 009 983	980 209

Yield (t/ha)(b)	13.4	13.2	12.5	

(a) Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

(b) Yield represents the quantity of grapes produced per hectare of bearing vines.

GRAPES(a), Australia, Production by selected variety (t) - Year ended 30 June 2006

SELECTED RED GRAPES

Shiraz	422 567
Cabernet Sauvignon	274 370
Merlot	123 085
Pinot Noir	33 933
Ruby Cabernet	26 382

SELECTED WHITE GRAPES

Chardonnay	397 441
Sultana	124 011
Semillon	96 934
Colombard	74 827
Muscat Gordo Blanco	54 425

(a) Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Note that more detailed varietal information will be available in **Australian Wine and Grape Industry** (cat. no. 1329.0) due for release in January 2007.

GRAPEVINES WATERED IN SEASON 2006, Australia(a) (ha)

SOURCE OF WATER

Surface water from state/private irrigation schemes	87 761
Other surface water	29 820
Underground water supply	32 587
Town or country reticulated water supply	4 493
Recycled water	3 278
Other	219
Not reported	10 991

WATERING METHOD

Drip or micro spray	116 822
Furrow or flood	12 017
Spray	25 928
Other	138
Not reported	10 361

(a) Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

About this Release

This product signals the availability of detailed final estimates from the vineyards survey.

Provides final estimates from the vineyards survey. This includes information at national and state levels on areas of vines (including, areas: bearing, not yet bearing and those removed or grafted) and production of grapes (for: winemaking, drying and table and other purposes). It also includes summary data on major grape varieties.
